Introductions

Jennifer Spanos

VP, Product and Vertical Strategy

Jennifer has 15 years in cannabis and food manufacturing software and operations, working to maximize the efficiency and profitability of customers' businesses.

Sterling Stoudenmire

President, Opus Fideles

Sterling brings over 20 years experience in building and leading companies. As the former CEO of Pure Greens, Sterling now runs Opus Fideles, a consultancy focused on helping cannabis companies build and scale their businesses.

Agenda

- Federalization
- Compliance systems (BioTrack/Metric)
- Standardization and visibility
- Supply chain and quality management
- Operational efficiency across multiple facilities

A stylized yellow leaf graphic is positioned on the left side of the slide, partially overlapping the text.

What should those building an MSO be preparing for with respect to the federalization of cannabis laws?

How should MSOs deal with using different compliance systems (ie BioTrack/Metric) across States?

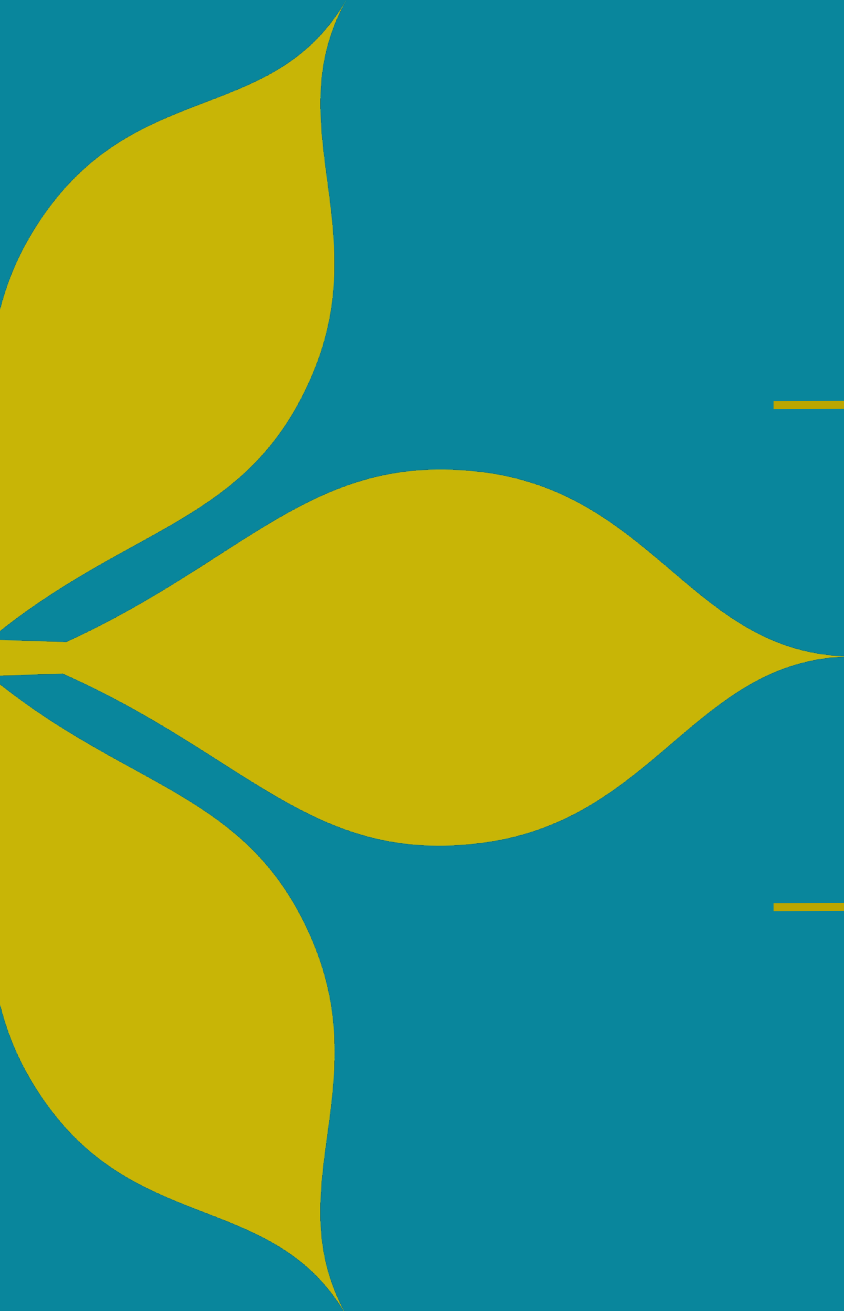

How can MSOs achieve operational efficiencies with state-specific data and processes across multiple business units/facilities?

How do MSOs standardize and get visibility across business units?

What have you seen MSOs do to address the supply chain to ensure they are delivering consistent quality?
